

TX★PWRT

TEXAS A&M PUBLIC WORKS RESPONSE TEAM

Keeping Texas running when disaster strikes

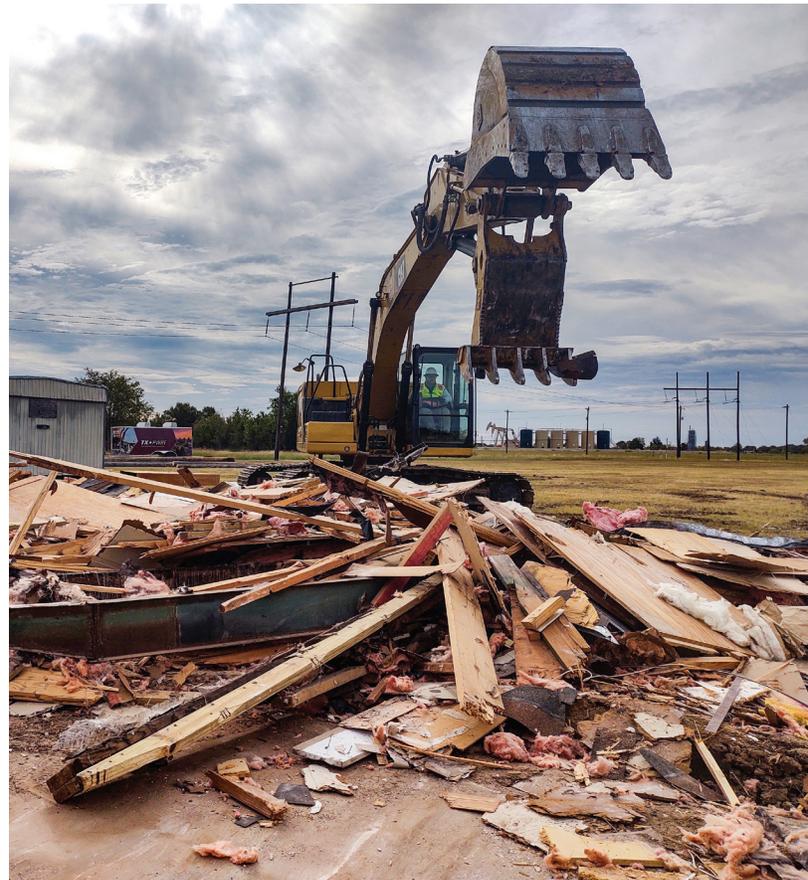

The Texas A&M Public Works Response Team (TX-PWRT) is a joint response team sponsored by the Texas A&M Engineering Extension Services and the Texas Division of Emergency Management with qualified experienced members who support local jurisdictions in their response to a catastrophic event by providing critical public works services as needed to facilitate recovery.

What is TX-PWRT?

The TX-PWRT is a state asset that is deployed by the Texas State Operations Center (SOC) to support local jurisdictions in the event of a catastrophic event. The TX-PWRT is comprised of multi-disciplined, multi-talented, and qualified members in the Public Works sector.

The TX-PWRT is designed to support local jurisdictions in their initial response and recovery efforts at three levels:

- **Planning Support:** *Specialized public works technical assistance for jurisdictions in performing rapid infrastructure damage assessment, and identifying capabilities and resource needs, while responding to and recovering from the consequences of a catastrophic event.*
- **Operational Support:** *Short-term augmentation of local public works resources as needed to expedite and enhance their response capability to a catastrophic incident/event.*
- **Liaison Support:** *Act as a point of contact for the local jurisdiction in support of the Incident Commander.*

Stay up-to-date with TX-PWRT:

Join the TX-PWRT

The TX-PWRT members are experienced and knowledgeable in public works activities such as Utilities (Electrical, Water, Wastewater, Storm Water, Environmental Safety and Compliance); Debris Clearance; Structural Safety; Transportation Systems; Heavy Equipment Operators, Fire Control Operations and Logistical Support.

Required training

Before becoming an active TX-PWRT member, you must complete the following required online training at: training.fema.gov

- IS-800.C: National Response Framework, An Introduction
- IS-700.B: National Incident Management System
- IS-200.B: ICS for the Single Resource and Initial Action Incidents
- IS-100.PWb: Introduction to the Incident Command System (ICS 100) for Public Works
